Skills

Hello! I'm an undergraduate student currently learning android development with kotlin and jetpack compose!

My expertise on Android Development is largely focused in area such as:

- OOP Fundamentals (Java, Kotlin)
- Android Fundamentals (Activities, Lifecycles, Fragments, Intents)
- Android UI/UX (Wireframing and prototyping in Adobe XD, then slicing the designs into XML or Jetpack Compose)
- Database (SQLite using room and non-SQL such as Firebase)
- Design Pattern (MVP, MVVM, and MVC)
- Jetpack Compose (States, Layout, Recomposition, Navigation, Animation)

I'm looking forward to an internship and job opportunities as an Android Developer.

• SQL • Java • Android Development • REST APIs • CRUD • Firebase • Adobe XD • Creative Problem Solving • Android Studio • Kotlin • Adobe Photoshop •

Experience

Neotica

– *Android Developer*
JUNE 2022 - PRESENT
During the start of the pandemics I began to learn about software development, especially in Android Development. I mastered the basics of Java programming language and developed several apps; one of which is in development waiting to be pushed into the Play Store under Neotica, a company that I conceptualized sometime around June. Neotica is a software development company that I can use to push my future project as I build my portfolio in Android software development.

– *Web Developer*
SEPTEMBER 2022 - OCTOBER 2022
I began the prototype design of neotica.id website in the midst of September, then finalized the design by the end of September. I begin editing and applying the codes for the website. At this stage,

I am only able to engineer static pages using HTML and CSS with a bit of JavaScript. Since my basics is Android Development, I tend to apply only the basics principles of Website Development. The webpage has entered its beta stage starting in early October.

Doxtrination Records - *Project Manager, Producer*
APRIL 2018 - JUNE 2020
I worked as a record producer and record mixer. I produced and distributed songs under Doxtrination, which gave me experiences in marketing and distributions. One record that was published under Doxtrination has gained thousands of listeners worldwide. I also handled the Instagram account.

BSD 88 CELL - *Manager*
OCTOBER 2018 - DECEMBER 2019
Back in 2018 after I graduated from high school, I decided that the college tuition is too high. Rather than applying for colleges, I decided that I should do something different. That's when I started this business plan. As much as I understand technology, there's nothing that I didn't know about the smartphone sector. I rented a small 2 story building hoping that I could live there to cut the cost and opened up as fast as I could in the morning. I started by selling data plans, phone cases, accessories, and even cheap phones. That's when I realized it was due to a bad strategic positioning and not as I expected competition was fierce at the time, expenses becoming too high, I started doing services for phones at the time to cut the cost. It was made worse following an unprecedented event surrounding COVID19, thus making the decision to close the business before losing more expenses.

Education

JULY 2021 - ONGOING
Universitas Bandar Lampung, Bandar Lampung - *Bachelor of Laws - LLB, Law*

2016 - 2018
SMAK BPK Penabur, Bandar Lampung - *High School Diploma - Business and Social Skills*

Certification
